Professional Summary

Data Analyst / Junior Data Scientist with practical experience in Python, SQL, exploratory data analysis (EDA), and business metric modeling. Proven track record evaluating customer churn, delivery SLA performance, and ad unit economics alongside building AI-driven NLP interfaces. Seeking a Data Analytics or Data Science role to drive scalable, data-informed business decisions.

Technical Skills

Core Analytics & ML: Exploratory Data Analysis (EDA), Statistical Modeling, Feature Engineering, NLP Basics, Regression
Programming & Querying: Python (Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn), SQL (PostgreSQL, MS SQL Server), R, C++
BI & Business Tools: Tableau, Power BI, Advanced Excel (Pivot Tables, VLOOKUP, Statistical Modeling)
Databases & Frameworks: PostgreSQL, MongoDB, RESTful APIs, Flask, Firebase, Git, GitHub, VS Code

Internship Experience

SDE Intern – Data & Backend Systems Sep 2025 – Oct 2025
Bluestock Fintech | *Certificate* *Remote*

- Engineered backend data queries and RESTful endpoints using Node.js and PostgreSQL to log multi-tier fintech transaction records.
- Audited database schemas for transactional integrity, reducing query latency and ensuring complete operational data consistency.
- Collaborated with engineering teams to structure financial logging logic and validate tabular data models against business requirements.

Projects

Food Delivery Performance and Profitability Analytics | *Python, Pandas, Seaborn* GitHub Link

- Developed an end-to-end analytics pipeline on 2,000+ restaurant transactions across metro cities to evaluate SLAs and margin leakages.
- Discovered delivery durations exceeding 45 minutes caused a 65% drop in 5-star customer ratings, defining a key retention threshold.
- Modeled unit economics by quantifying Gross Merchandise Value (GMV), 22% platform commission take-rate, and discount subsidy burns.
- Automated exploratory visualization dashboards highlighting category revenue distributions and digital payment adoption.

Healthcare Diagnostic AI Assistant | *Python, Flask, Groq API, NLP* GitHub Link

- Engineered an AI symptom analysis assistant in Python utilizing Groq API for rapid NLP inference and contextual understanding.
- Designed semantic intent-matching algorithms to parse unstructured patient queries and output standardized clinical guidance.
- Implemented data validation layers to sanitize text inputs and prevent inaccurate diagnostic classifications in conversational flows.

Interactive Educational Platform Analytics | *React.js, JavaScript, Firebase* May 2025 – Jul 2025

- Engineered a data-driven web platform featuring user behavior tracking pipelines and modular study interfaces.
- Configured Firebase NoSQL database collections to aggregate user completion rates, session duration, and content engagement.

Education

Lovely Professional University 2023 – 2026
Bachelor of Computer Applications (BCA) – CGPA: 7.99/10 *Jalandhar, Punjab*

Adarsh Vidya Mandir 2021 – 2023
Intermediate (Class XII - PCB) – Percentage: 75.6% *Bokaro, Jharkhand*

Adarsh Vidya Mandir 2020 – 2021
Matriculation (Class X) – Percentage: 79.0% *Bokaro, Jharkhand*

Certifications & Activities

Amazon Sponsored Ads Certification: Amazon Ads Academy (Oct 2026) | Credential Link
Amazon Ads Foundations Certification: Amazon Ads Academy (Mar 2026) | Credential Link
Code-A-Haunt 2.0: State-Level Hackathon Participant (Feb 2024) | Verify Credential
